DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anthony P. Curtis on 12/4/2003. The application has been amended as follows:

- Claim 1 has been amended as follow:

An inner rotor motor comprising a rotor which includes a plurality of magnetic poles arranged circumferentially and a stator which is positioned outside a circumference of the rotor, has a stator core which includes six magnetic pole teeth which face the rotor in an opposed manner and arranges coils on respective magnetic pole teeth, **wherein said stator is arranged within 180° with respect to a center angle of the rotor**, wherein pitches of the magnetic pole teeth in a rotor circumferential direction along which respective rotor facing surfaces of the magnetic pole teeth are arranged are set smaller than pitches of the rotor in the rotor circumferential direction along which the magnetic poles of the rotor are arranged.

- Claim 3 has been cancel.

Art Unit: 2834

2. The following is an examiner's statement of reasons for allowance:

The Prior art teach:

An inner rotor motor comprising a rotor which includes a plurality of magnetic poles arranged circumferentially and a stator which is positioned outside a circumference of the rotor, has a stator core which includes six magnetic pole teeth which face the rotor in an opposed manner and arranges coils on respective magnetic pole teeth, wherein pitches of the magnetic pole teeth in a rotor circumferential direction along which respective rotor facing surfaces of the magnetic pole teeth are arranged are set smaller than pitches of the rotor in the rotor circumferential direction along which the magnetic poles of the rotor are arranged.

The Prior art, along or in combination, doesn't teach or suggest the following limitation:

The stator arranged within 180° with respect to a center angle of the rotor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
